The Limits of AI Scribes

HEALTHTECH

While AI scribes promise to streamline documentation, they fail to address the deeper inefficiencies in clinical workflows that burden physicians.

Improving CX in Healthcare

HEALTHTECH

Can healthcare learn from retail's customer experience (CX) standards? This article explores the benefits of phygital experiences in enhancing patient care.

An illustration of two people, a man and a woman, standing on a reflective surface and placing large yellow stars on a dark grey wall. The man is on the left, wearing a blue shirt and dark pants, reaching up to place a star. The woman is on the right, wearing a light grey shirt and dark pants, also reaching up to place a star. There are several other yellow stars already on the wall, some of which are partially obscured by the text.

Importance of Accurate Patient Records

HEALTHTECH

To enhance patient care ratings, accurate risk assessments in healthcare records are crucial. Discover the implications for healthIT.

Nurses & AI Integration

HEALTHTECH

Nurses must play an active role in the implementation of AI technologies in healthcare, ensuring better patient care through their insights.

Advancements in Parkinson's Care

HEALTHTECH

Discover how Medtronic and UCSF are revolutionizing Parkinson's care by empowering patients to take control of their symptoms through innovative technology and support.
